

CWA/AT&T MOBILITY BENEFITS

BARGAINING REPORT

June 16, 2008

The Bargaining Committee met again with the Company on Friday with demands that they provide outstanding data still owed to us. It is still apparent that we are the only ones who came to this table to look for possible solutions to what the Company says, but can't show, are problems with the current health care plan. Instead, the Company wants us to simply put forward another proposal with "shot in the dark" ingredients of retrogression! But we are not interested in giving into the astronomically impacting demand the Company proposed on June 4!

The Company's suggestion that, for a family, an employee who earns the average salary within Mobility today should have to pay out more than 17 percent of their annual income before the plan kicks in is insane, let alone unreasonable and immoral! We feel that the Company has wasted enough time avoiding the questions and they need to get serious if we have any chance at reaching a tentative agreement! They need to **DO THE RIGHT THING!**

The Bargaining Committee appreciates all of the support you have shown!!

Bargaining has been recessed and will reconvene on June 27.
